

Gambling Disorder Screening Day

Video List: Gambling Disorder & Gambling-related Harms

The videos included in this list will serve as a great resource for general education around the harms that people can experience from gambling.

For mental health professionals supporting clients experiencing gambling-related problems, we also suggest exploring the additional resources and training opportunities offered by the MA Technical Assistance Center for Problem Gambling Treatment (M-TAC), which is funded by the MA Department of Public Health Office of Problem Gambling Services. M-TAC is guided by public health principles and focused on equity. All trainings and resources are developed based on best practices and evidence-based information, and offered free of charge. Visit www.m-tac.org to learn more.
